

Lighting Plan

Laura Kivistik | Vertical Rope

General Lighting Requirements:

- 3 wide parcan spot lights from right above the rigging point, each pointed to a different height on the rope (on the top, middle and bottom)
- 2 LEDs on each side of the stage
- 3 small fresnels on the ground in the front of the stage

Lighting Cues:

- Blackout
- The 3 above spots fade in slowly and stay on for the remainder of the act. At the same time, the 3 front fresnels also fade in to a 20% capacity. Then the music starts.
- As the music changes to 'Purple Haze', the side LEDs change into a yellowish hue and stay on for the remainder of the act.
- When the artist comes down from the rope the second time, sits down and let's the rope go behind her, there is a 2 second music fade out. After that, the lights slowly fade out into a blackout.
